

Dear Hiring Manager,

I'm writing to express my interest in the Lead, UX Product Designer role within Deloitte's DT-US Product Engineering team. My background centers on designing complex, enterprise-scale products where clarity, usability, and delivery rigor are critical - and where designers are expected to operate across strategy, interaction design, and execution.

In my current role at ACV Auctions, I lead UX for high-impact pricing and workflow platforms used across desktop and mobile. I regularly shape big-picture workflows while also designing detailed interaction and visual patterns, working within lean, iterative delivery models alongside product, engineering, and research partners. This balance between strategic thinking and hands-on design closely aligns with how Deloitte describes this role.

I bring strong experience conducting heuristic evaluations, translating research into actionable design decisions, and producing comprehensive design assets - from user flows and journey maps to wireframes, prototypes, and detailed specifications. I'm comfortable owning design end-to-end on a product squad, while also contributing to shared frameworks and systems that ensure consistency across a broader product suite.

Equally important, I understand the enterprise context. Much of my work requires balancing user needs with business priorities, technical constraints, and delivery timelines - often in ambiguous or evolving problem spaces. I'm known for asking the right questions early, identifying design risks, and proposing pragmatic, elegant solutions that teams can implement with confidence.

I'm drawn to Deloitte's Product Engineering team because of its emphasis on outcomes, craft, and innovation at scale. I'm excited by opportunities where UX plays a strategic role in shaping how organizations operate internally and deliver value externally.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience can support Deloitte's design and product goals.

Sincerely,

Jake Maisel
