*Case studies at **jakemaisel.com**: Guaranteed Sale, ClearCar, MAX + ClearCar, New Car Pricing*

## SUMMARY

Senior Product Designer with 11+ years in design, including 7+ years focused on UX and 5+ years at ACV Auctions leading design and research for pricing, appraisal, and AI-powered products. Grew Guaranteed Sale 10× in under a year, led design for ClearCar's AI trade-in platform for three years, and led the research that merged two appraisal products into one. Designs in code with Storybook, builds AI-assisted prototypes, and wrote ACV's playbook for creating in-product guides with Claude.

## CORE COMPETENCIES

Product Strategy • User Research • Mixed-Methods & Competitive Usability Testing • Journey Mapping
Information Architecture • Design Systems • Complex Workflow Design • Responsive Web & Mobile
Workshop Facilitation • Stakeholder Alignment • Design Leadership & Mentoring • Accessibility
Figma, FigJam, Storybook • Designing in Code • AI-Assisted Prototyping (Claude) • Miro • Jira • Pendo

## EXPERIENCE

### Product Designer III (Lead Designer, Pricing & Appraisal) | ACV Auctions *2021 – 2026*

*Automotive marketplace platform powering dealer inventory, pricing, appraisal, and auction workflows across retail and wholesale channels*

- **Grew Guaranteed Sale 10×** (~30 to 300+ cars a week) as lead designer and researcher. Interviewed 25+ dealers, moved the offer into the inventory table where dealers already decide, and cut pricing from 1–2 days to under 5 minutes for 95% of cars; the share of unsold cars choosing it rose from 2% to 32%.
- **Merged ACV's two appraisal products**, MAX and ClearCar, into one platform as lead researcher and designer. Found 80% feature overlap, defined the 8 capabilities worth keeping, validated the direction with dealers, and won unanimous executive approval; phase one launched June 2026. Also designed the mobile appraisal-to-inventory flow: under two minutes, zero critical bugs at launch.
- **Led design for ClearCar**, ACV's AI-powered trade-in platform, for 3 years: a consumer offer flow that 65%+ of users complete, photo capture with AI damage detection, and dealer tools for desktop and mobile. In 2026, redesigned its offer widget in code with a live Storybook prototype and joined engineering code review.
- **Cut a 20+ week design estimate to under 10** by creating ACV's first white-label component system: audited 8 screens, ran 3 standardization workshops with design and engineering, and wrote the guidelines. The pattern was reused in 3 other products.
- **Averaged 4.2/5 for adoptability** in 8 mixed-methods dealer sessions testing my New Car Pricing prototype side by side with the current product and the leading competitor (3 of 8 groups rated it 5/5); phase one shipped with immediate dealer adoption.
- **Launched ACV Offers** (2026), a guaranteed offer before inspection, across pricing, inventory, offer, condition disclosure, and mobile screens; supported the ACV Guarantee launch with in-product onboarding guides and a pre-launch audit.
- **Lifted lead generation 3.5%** in a 4-week test of BidRev, a consumer brand I built from scratch (everything but the name: brand, messaging, site, and go-to-market), giving ACV a fast, low-cost answer not to scale it.

### Senior Marketing Associate | Greystar *2020 – 2021*

*Digital marketing and creative initiatives across multifamily communities, driving brand engagement, lead generation, and leasing performance*

- Directed custom website and digital experience projects with development teams, improving UX/UI quality, usability, and brand consistency from concept through launch.
- Developed end-to-end brand systems and marketing assets for a cohesive customer experience across digital, social, advertising, and property channels.

### Senior Graphic Designer | Alliance Residential Company *2018 – 2020*

*Creative and digital design across web, email, social, advertising, presentations, print, and environmental experiences for a large residential portfolio*

- Grew the portfolio of high-value clients by ~40% by delivering high-quality custom creative and strengthening client relationships.
- Reviewed junior designers' work and set standards, templates, and workflows that raised design quality across the team.

### Logo Specialist → Senior Designer | GoDaddy *2015 – 2018*

*Customer-facing digital, marketing, and brand experiences at scale*

- Spearheaded the development and launch of GoDaddy's first self-service logo design product, letting customers build and customize their own brand identity.
- Led a design team delivering customer-facing digital, marketing, and brand work with top client satisfaction scores; contributed to work recognized with a 2016 Stevie Award for Best Use of Technology in Customer Service.

## EDUCATION

**Bachelor of Arts, Graphic & Web Design**
The Art Institute of Phoenix
